

# Polyester (PET) Protective Tapes

Backing	Adhesive	ESD Property	Optical Property	Liner Type	Application	Remark
5mil PET	Anti-static Silicone	Anti-static		3mil Black PET	Surface protection (printable) for electronic displays, such as cell phone, ATM, touch panel displays	Anti-static, scratch resistant coating; currently being used on certain Samsung and LG phones and tablets
5mil OCA PET	Anti-static Silicone	Anti-static	OCA	3mil PET	Semi-permanent and permanent surface protection for electronic and touch screen displays	Anti-static silicone, scratch resistant coating, optically clear (OCA) film and adhesive
4mil PET	Silicone			3mil PET	Surface protection	Hard coating, top tape
4mil OCA PET	Silicone		OCA	2mil White PET	Display protection Over-lamination	Hard coating, top tape, optically clear (OCA) film and adhesive
4mil PET	Silicone			2mil PET	Display protection Over-lamination	Anti-glare, finger print resistant top coating
3mil PET	Silicone			1mil PET	Display protection, "carrier" tape during converting and processing	Low tack silicone adhesive specially designed for excellent "wet out" and adhesion stability
3mil PET	Silicone			1mil PET	Display protection, "carrier" tape during converting and processing	Very low tack silicone adhesive specially designed for excellent "wet out" and adhesion stability
1.5mil PET	Acrylic			Paper	Temporary surface protection	Currently being used as temporary protection tape during manufacturing of Samsung phones and tablets
1.5mil PET	Acrylic			Paper	Temporary surface protection	Surface protection for electronic exterior casing, and automotive interior (GPS, arm rest, leather molding, etc.)
1.5mil PET	Acrylic			White PET	Temporary surface protection	Surface protection for electronic exterior casing, and automotive interior (GPS, arm rest, leather molding, etc.)
